HAIDER GILANI

New York, NY | U.S. Citizen | h@haidergilani.com | linkedin.com/in/haidergilani | github.com/haiderekarrar

Computer science graduate who learns unfamiliar operations from the people in them, separates real constraints from assumptions, and aligns incentives to deliver results professionals said weren't possible.

OPERATING EXPERIENCE

Independent Real Estate Operator | Dubai, UAE **Aug 2025**

- Entered UAE real estate with no local experience, priced two properties using a spreadsheet of a year's comparable sales, and closed $312K within 7 days of first agent contact vs. the 1–3 months every professional quoted.
- Screened ~70 brokers overnight and ran the best two against each other, paying more the faster they sold.
- Kept the brokers, lawyers, bank, and developer working in parallel, closed without the UAE bank account everyone said was required, and cleared a last-minute block on the developer's approval in person.
- Got every broker commitment in writing, since verbal promises often didn't match the paperwork, and authenticated three cashier's checks at the issuing banks.

Restoration & Operations Lead | Lahore, Pakistan **May 2025 – Jul 2025**

- Led a 60-day restoration of a ~16,000 sq ft century-old estate with 40–50 workers across eight trades in 120°F heat.
- Designed level-triggered pump drainage that ended flooding going back to the 1960s.
- Learned each trade well enough to judge the work and memorized material prices to catch overbilling, paid only for work that passed my inspection, and replaced underperformers.

Real Estate Turnaround Lead | Brooklyn Park, MN **Apr 2022 – Dec 2022**

- Took over a distressed rental remotely and, during my first semester of college, sold it for $226K, 51% above every prior offer. Countered the final buyer up from $220K cash against agent advice.
- Vetted dozens of agents with a structured evaluation matrix and hired the best on a tiered commission (4.2% up to $200K, 8.2% above).
- Re-scoped a ~$78K repair estimate to ~$18K, then spent only $1,105 on sale-critical prep.
- Negotiated a hostile tenant out nearly two months before lease end, then held the sale together through his sabotage, including threats to burn the house down during closing week.
- Met a same-day closing deadline by intercepting the outgoing mail truck.

TECHNICAL PROJECTS

The Plausibility Trap | AI-agent evaluation | github.com/haiderekarrar/thePlausibilityTrap **Jul 2026 – Aug 2026**

- Designed a study testing how AI agents would respond to a $220K cash offer from my 2022 Minnesota sale, without telling them how I actually responded. Scored three prompting approaches on a rubric fixed in advance.
- Leveraged AI coding agents to build a Python pipeline that gave the tested agents the same 586 emails and messages I had at the time, with redaction, PII checks, Pydantic validation, and 22 unit tests.
- Caught a redaction bug corrupting the text before any results were scored.
- Found that an agent's answer can sound convincing while missing key facts. In one run, a sub-agent found two earlier offers on the house, but the final answer never used them.

SKILLS

Technical: SQL, Python, C++, Excel/Google Sheets, Git/GitHub, LLM/agent evaluation, Claude Code, OpenAI Codex
Operations: stakeholder and vendor management, negotiation, incentive design, cost control, crew leadership

EDUCATION & ADDITIONAL

Fordham University | B.S. Computer Science | Coursework: Database Systems, Data Mining **May 2026**

Palantir Foundry & AIP: four training badges (2026) | **SAT:** 1520, 99th percentile (790 Math)

Languages: English, Urdu (native), Hindi (spoken) | Memorized a ~77,500-word classical Arabic text in 11 months
